# Planning for Emergencies

If a disaster struck, would your family be ready? Would your business be ready? Taking simple steps today could save lives and prevent suffering later. Follow the tips and checklists in this special guide to protect your loved ones, your home and your business.

This guide was developed by your county emergency management agency to help you make your family and business plans. It also directs you to additional resources where you can get more information and assistance.

Government cannot do this alone. It takes the “whole community” to effectively prepare for, respond to, and recover from a disaster. This includes our neighborhood and condo associations, faith-based, volunteer, and civic organizations, schools, and the business community, as well as residents. Find out if there is a Community Emergency Response Team (CERT) in your neighborhood and get the training. If there is not a CERT, think about starting one. Contact your local emergency management agency or fire department. In addition, we need to ensure that our plans include the needs of our children, seniors, the disabled, and those who face poor health (mentally or physically).

So, get involved and spread the word at your school, work, club or place of worship. This is what it takes to make our community safer and more resilient.

## 1 Your Disaster Plan

Prevent panic and confusion by making sure everyone knows where to go and what to do in an emergency, whether at home or at work.

- **PICK TWO MEETING PLACES.** One should be just outside your home or business for sudden events such as a fire. The second should be outside your neighborhood, in case you can't get home or family members get separated.

- **CHOOSE A CONTACT PERSON.** Ask someone out of the area to coordinate communications in a disaster. Family members should call this person to report their location. Send your contact copies of important papers (ID, insurance, etc.)

- **KEEP YOUR CONTACT INFORMATION UP-TO-DATE.** Include contact information in your phones and make emergency contact cards to carry with you.

- **THINK AHEAD ABOUT EVACUATION.** Determine if and when you would have to evacuate, where you would go and how you will get there. Ask friends or family if you could stay with them. If you are in a safe area, invite them to stay with you.

For more disaster planning information, contact your local emergency management agency, local chapter of the American Red Cross (phone numbers are listed on the inside map page) or go online to [www.tampabayprepares.org](http://www.tampabayprepares.org) or [www.floridadisaster.org](http://www.floridadisaster.org) or [www.ready.gov](http://www.ready.gov).

- **KNOW YOUR RISK.** Learn what disasters might affect your area. Are you in a Hurricane Evacuation Zone (see inside map page) or FEMA Flood Zone? (They are different!) Take first aid and CPR courses ([www.redcross.org](http://www.redcross.org)).

# 2

## Disaster Supplies

Here are the most important items for your Disaster Supply Kit. Stock up today (or a little at a time) and store where you can get to them quickly.

### Replenish for Freshness:

- Medicines: Keep an updated list of family medicines and dosages along with doctor and pharmacy phone numbers. Keep a two week supply of prescription medicines.
- Food: Keep enough food to feed the whole family for three to seven days. Choose things that don't need refrigeration or cooking (canned foods, protein bars, peanut butter, etc.). Don't forget any special dietary foods or baby food and formula, if needed. Replenish every six months.
- Drinking water/containers - 1 gallon of water per person for drinking water plus water for cooking and washing (minimum 7 days). Stock up on a few cases of bottled water at home and office in the event that there is a "boil water" order.
- Extra batteries for camera, flashlights, radio, portable TV & lamps, etc.
- Infant items (medicine, sterile water, diapers, ready formula, bottles), if needed.

### Stow Until Needed:

- First aid book and kit including bandages, antiseptic, tape, compresses, aspirin and aspirin-free pain reliever, anti-diarrhea medication, antacid, and important numbers
- Flashlights and batteries for each member of the family
- Portable radio and batteries
- Non-electric can opener
- Fire extinguisher (small canister, ABC type)
- Instant tire sealer
- Whistle and/or distress flag
- Mosquito repellent

- Sunscreen
- Plastic tarp, screening, tools and nails, etc.
- Water purification kit (tablets, chlorine (plain) and iodine)
- Clean-up supplies (mop, buckets, towels, disinfectant)
- Camera
- Garbage can or bucket with tight-fitting lid and kitty litter (for emergency toilet)
- Plastic trash bags
- Toilet paper, paper towels and pre-moistened towelettes or baby wipes

### If you evacuate you also should take:

- Pillows, blankets, sleeping bags or air mattresses
- Extra clothing, shoes, eyeglasses, hearing aids (and batteries), etc.
- Folding chairs, lawn chairs or cots
- Personal hygiene items (toothbrush, toothpaste, deodorant, etc.)
- Quiet games, books, playing cards and favorite toys for children
- Important papers and irreplaceable keepsakes (driver's license, special medical information, insurance policies and property inventories, photographs)

### Precious commodities before & after a storm:

- Emergency charger for cell phones and other mobile devices (consider a solar powered alternative)
- Cash (With no power, banks may be closed; checks and credit cards unaccepted, and ATMs may not be operational)
- Charcoal, matches, and grill (Do not use indoors)
- Ice
- An old-fashioned corded telephone (ie. not a cordless or cell phone) that does not require electricity

# 3

## Bracing For A Hurricane

### As the Storm Approaches

- Listen for weather updates on local stations and on NOAA Weather Radio. Stay tuned to the latest information.
- REMEMBER: Hurricanes can be unpredictable. There is always potential error in the forecast track from the National Hurricane Center. Don't focus on the exact forecasted track, listen to local officials. (For more information go to [weather.gov](http://weather.gov), click on Tampa Bay area.)
- Check your Disaster Supplies. Get any needed items.
- Clean and fill bathtubs and sinks before a storm so you'll have extra clean water.
- Turn refrigerator and freezer dials to the coldest settings and avoid opening the doors to help keep perishable food in case of a power outage.
- Refill prescriptions. Maintain at least a two-week supply of medication during hurricane season.
- Clear your yard of lawn furniture, potted plants, bicycles, trash cans and other potential airborne missiles. Leave the swimming pool filled and super-chlorinated. Cover the filtration system.
- Protect your windows and glass doors with plywood or storm shutters. Brace double entry and garage doors at the top and bottom.
- If there is a chance flooding could threaten your home, move important items such as electronics, antiques and furniture off the floor.
- Fill your car's gas tank and check oil, water and tires. Gas pumps won't operate without electricity.
- Secure your boat early. Drawbridges will be closed to boat traffic after an evacuation order is issued.
- Get cash. Banks and ATMs won't work without electricity and few stores will be able to accept credit cards or personal checks.
- Never sweep or blow yard leaves, pine needles, grass clippings or soil into the street or storm water system. This clogs up the stormwater pipes and prevents water from draining.
- If you own a business, follow your Business Continuity Plan. For more information on how to create a Business Continuity Plan, go online to [disastersafety.org](http://disastersafety.org) or [ready.gov](http://ready.gov)

**You will get some warning with a tropical storm or hurricane.**

# 4

## Evacuate or Stay?

### If You Can Stay Home, Shelter-In-Place

If you live in a sound structure outside the evacuation area and do not live in a mobile home or RV, stay home and take these precautions:

- Make sure your windows, doors and garage doors are protected.
- Clean containers including your bathtub for storing water. Plan on three gallons per person, per day, for at least seven days for drinking and other uses.
- Offer your home as shelter to friends or relatives who live in vulnerable areas or mobile homes.
- Check your Disaster Supplies. Make sure you have at least a seven day supply of non-perishable foods. Don't forget a non-electric can opener.
- During the storm, stay inside and away from windows, skylights and glass doors.
- Find a Safe Room in your home, usually an interior, windowless reinforced room such as a closet or bathroom on the lower floor.
- Wait for official word that the danger is over.
- If flooding threatens your home, turn off electricity at the main breaker.
- If you lose power, turn off major appliances, such as the air conditioner and water heater to reduce damage from surge when power is restored.
- Monitor your battery-operated radio, NOAA weather radio or TV for the latest advisories and other emergency information.
- Do not travel until you are told it is safe to do so.

### If You Must Evacuate

If you live in an evacuation area or a mobile home or RV, when an evacuation order is given, don't panic. Move at a steady pace and ensure you leave enough time to get to where you will weather the storm. DO NOT take chances with your life by staying at home or waiting until it's too late!

- Make sure your destination is not within a zone that has been ordered to evacuate.
- Take enough supplies for your family.
- Take your pets. Don't forget their supplies.

- Take important papers, including your driver's license, special medical information, insurance policies and your insurance agent's name and number and property inventories.
- Also take irreplaceable items, such as photos or keepsakes.
- Let friends and relatives know where you are going.
- Make sure your neighbors have a safe ride.
- Turn off your electricity, water and gas if officials tell you to do so.
- Lock your windows and doors.
- Stay tuned to your local radio and television station for emergency broadcasts.

### Leaving Coastal Areas

If you are leaving the area, remember to take supplies with you. Move inland away from the storm surge and inland flooding, but it is recommended that residents evacuate **"tens of miles, not hundreds"** if possible. Roads will be heavily congested and you run the risk of being caught on the highway without a safe refuge or running into the storm if it takes a different track.

### Hotel or Motel

If you plan to go to a hotel or motel, you will need to check for availability and make your reservation well in advance. Some hotels/motels have standing reservation hurricane programs and some relax their pet restrictions in an emergency. Again, make sure your destination is not in an evacuation zone.

# Help Your Neighbor

# 5

- People who are disabled or in poor health (either mentally or physically) or those who are without the support of family or friends should plan ahead for an emergency. They may need special assistance from family members, friends, neighbors or social service agencies. Please ask for help if you need it and volunteer to help those who do.
- Remember, too, that older adults who are also caregivers may require outside assistance. Excessive stress and anxiety can contribute to increased episodes of illness, particularly for persons with heart disease and other illnesses.
- If an older adult lives in a nursing home, assisted living facility (ALF) or residential facility, the administrator should be contacted to learn about the disaster plan for that facility.

## Home Healthcare & Homebound Patients

- Tell your health agency and oxygen company where you will be during a hurricane. Ask them about their plans to provide care.
- If you are homebound, but not under the care of a home health agency, contact your physician to determine your best plan of action.
- If you require respirators or other electric-dependent medical equipment, you should make medical arrangements with your physician. You should also register with your local power company.
- If you evacuate, remember to take medications, written instructions regarding your care, special equipment and bedding with you.
- If you will need assistance in an evacuation or need to go to a special needs/medically dependent shelter, please register with your County Emergency Management Agency NOW, during "blue sky" (non-emergency) conditions.
- Special needs/medically dependent shelters do not provide hands-on medical care, only medical monitoring. Bring one caregiver with you.

# 6

## Keep Your Pets Safe

Don't leave your pet and don't use your pet as an excuse not to evacuate.

Don't put yourself, your family and your pet at risk! You are responsible for planning for your pet.

If you are ordered to evacuate, take your Pet Disaster Supplies if you go to friends, relatives or a hotel. Many shelters/evacuation centers will not turn away pets. However, as a pet owner, you must plan ahead. Check out your options. For more information call your local SPCA, Animal Control or Humane Society. If you plan to go to a hotel or motel, go online to [petswelcome.com](http://petswelcome.com).

After the storm has passed, be careful allowing your pet outdoors. Familiar scents and landmarks may be altered and your pet could easily be confused and become lost. Downed power lines, other animals and insects brought in with high water could present real dangers to your pet. Take care not to allow your pet to consume food or water which may have become contaminated. Nearly 80 percent of pets displaced by a storm are never reunited with their owners.

### Pet Disaster Supplies

- Proper ID collar and rabies tag/license
- Vaccination paperwork\*
- Carrier or cage (large enough for your pet to move around)
- Leash
- Ample food supply (at least two weeks)
- Water (minimum of 7-day supply)
- Water/food bowls
- Any necessary medication(s)
- Specific care instruction
- Newspapers, cat litter, scoop, plastic trash bags for handling waste
- Proper ID on all belongings (including emergency contact information if you evacuate)

- Photo of you and your pet
- A comfort item such as a favorite toy or blanket
- Non-electric can opener
- Microchipping your pet is strongly recommended

\* Make sure your pets have had all their shots within the past 12 months. Pet-friendly shelters/evacuation centers and boarding facilities will require proof of vaccinations.

# 7

# Protect Your Home and Business

There are some specific actions you should take to make your home and business safer. To make some of these improvements, you will have to get up in the attic or crawl space with a flashlight.

You may feel more comfortable with an experienced and licensed inspector, architect, engineer or contractor.

Whatever choice you make, take time to do this well before the storm threatens. To withstand the forces of wind associated with severe weather, **REMEMBER your ABCs:**

- **ANCHOR YOUR ROOF**
- **BRACE YOUR ENTRY & GARAGE DOORS**
- **COVER YOUR WINDOWS**
- **SAFE ROOM** - DO NOT stay in a room which does not have shielded windows/glass doors. Find an interior room – a bathroom, hallway or closet which will help buffer you from the storm’s winds and any flying debris. Safe rooms can also be site-built or manufactured and can be installed in new or existing homes. For more information visit [flash.org](http://flash.org) or [highwindsaferooms.org](http://highwindsaferooms.org). Make sure all family members know where the safe areas are in your home. Be sure to take your disaster supplies with you into your safe room.

## For Mobile Home or RV Residents

All mobile home and RV residents must evacuate for any hurricane evacuation order given in the county, regardless of location within the county. Never stay inside a mobile home or RV to ride out the storm. Always evacuate to a friend’s or relative’s home, hotel, motel or nearby designated shelter/evacuation center.

Anchor mobile homes or RVs with tie downs. Inspect tie downs annually.

## Building or Remodeling?

For tips on how to make your home safer, go to [flash.org](http://flash.org) (Federal Alliance for Safe Homes), call Toll-Free (877) 221-SAFE (7233) or visit [mysafeflorida.org](http://mysafeflorida.org).

## Protecting Your Property from Flood

- ✓ Anchor and Elevate: If vulnerable, electrical panel boxes, heat pumps, washers, dryers, water heaters, fuel tanks, etc. should be elevated or relocated to areas less likely to be subjected to flood waters.
- ✓ Retrofit: There are things you can do to minimize the flood risk to your home. Options to consider:
  - Elevation
  - Flood barriers
  - Dry flood proofing
  - Wet flood proofing

For more information, go to:  
[Flash.org](http://Flash.org) or [FloodSmart.gov](http://FloodSmart.gov)

# 8

## A Word About Insurance

Understanding what is – and is not – covered in your homeowner’s or renter’s insurance policy is a necessity. Take time now to learn about the risks you may face and build confidence that you are properly protected. Read your policy. Talk with your agent. Reviewing your insurance coverage annually is an important step to maintain the level of insurance protection necessary to be able to rebuild your home and replace your personal belongings. Ask your agent if there are any possible discounts for performing mitigation measures to your home or business.

### 6 Steps to Proper Insurance Protection

1. Insure your home for its reconstruction cost, not its real estate value.
2. If you rent, you need insurance to protect your belongings.
3. Know your flood risk. Standard homeowner’s policies do not cover damage from floods, including storm surge from a hurricane. Remember, there is a 30-day waiting period for flood insurance to go into effect. Don’t wait until a storm is threatening.
4. Set aside funds to pay your hurricane deductible.
5. Get covered for the costs of building code upgrades.
6. Inventory your home’s contents to accurately price coverage and speed the claims process. There is free, secure online home inventory software available from the Insurance Information Institute at [KnowYourStuff.org](http://KnowYourStuff.org).

Acknowledgement: Insurance Information Institute [www.iii.org](http://www.iii.org)

Hurricane Evacuation Zones and FEMA Flood Zones are different. [www.floodsmart.gov](http://www.floodsmart.gov)

# Know Your Disaster Safety Tips

## FLOODS

1. If flooding threatens, get to higher ground. Stay away from flood-prone areas, including low spots, ditches, etc. Take dry clothing, a flashlight and a portable radio with you.
2. **TURN AROUND; DON'T DROWN.** Avoid flooded areas or those with rapid water flow. Do not attempt to cross a flowing stream or drive in water. The depth is not always obvious. It takes only six inches of fast flowing water to sweep you off your feet.
3. Do not allow children to play in or near high water, storm drains or ditches! Flood waters may be contaminated with oil, gasoline or raw sewage.
4. Purchase flood insurance.

## TERRORISM / VIOLENT CRIME

1. See Something - Say Something. Call local law enforcement, then Florida's toll-free hotline 1-855-352-7233 (1-855-FLA-SAFE) to report any suspicious activity. If it is an emergency, CALL 911!
2. Your Family Disaster Plan should include emergency contacts and a designated meeting place. Be prepared to respond to official instructions, such as the evacuation of the building or the area.
3. Disaster Supplies - If you need to evacuate your home or are asked to "shelter-in-place", having some essential supplies on hand will make you and your family more comfortable.

## FIRE

1. Plan - The time to plan for a fire emergency is now. Take a few minutes to discuss with your family or colleagues what actions you will need to take as you make your Disaster Plan for your family or business. Contact numbers are extremely important. Have working smoke alarms in your home and test them monthly.
2. Evacuation Plan - Decide where you will go and how you will get there. Unlike evacuating for a hurricane, with fire you may only have a moment's notice. Two escape routes out of your home and out of your neighborhood are preferable. Have a plan for evacuating your pets or service animals.
3. Fire Drills - Practice. Make sure everyone knows at least two escape routes from your home or business.

## HAZARDOUS MATERIALS INCIDENT

IF YOU'RE TOLD TO EVACUATE: You should move to the place/shelter designated by public officials.

1. Stay calm. Quickly gather what you will need, unless you are told to leave immediately.
2. Keep car windows/air vents closed. Do not use the air conditioner until you are out of the evacuation area.

IF YOU ARE TOLD TO STAY INDOORS AND SHELTER-IN-PLACE:

1. Stay inside until local officials say you can leave safely. Bring pets indoors.
2. Close all doors and windows. Seal all gaps under doorways and windows with damp towels and duct tape. Turn off heating, cooling or ventilation systems.
3. If you are told to protect your breathing, cover your nose and mouth with a damp handkerchief or other cloth folded over several times.

# 9

# Keep a Paper Trail

Keep important documents in a fireproof safe or box and a copy in a secure location away from your home or business. Inventory your property and possessions and take a video survey of your property.

- Proof of residence / ownership
- Birth and marriage certificates
- Passports
- Social Security cards
- Bank and credit card information
- Wills, deeds and copies of recent tax returns
- Stocks and bonds
- Copy of driver's license
- Special medical information
- Insurance policies
- Property inventories or photos of your home or business
- Business tax license
- Business supply/vendor lists

## TORNADO

1. Purchase a NOAA Weather Radio and/or a battery-powered commercial radio and extra batteries.
2. Many mobile phones are capable of receiving Wireless Emergency Alerts (WEAs). These alerts can inform you about life-threatening weather conditions in your immediate area.
3. Know the terms used to describe tornado threats:
  - Tornado Watch - Tornadoes are possible. Remain alert for approaching storms.
  - Tornado Warning - A tornado has been sighted or indicated by weather radar. Take shelter immediately if a Tornado Warning is issued for your area.
4. If a tornado threatens, seek shelter in a small, windowless interior room or hallway on the lowest level of a sturdy building.
5. Mobile homes are not safe during tornadoes. Abandon mobile homes and go to the nearest sturdy building immediately.
6. If you are caught outdoors, seek shelter in a sturdy building, NOT a mobile home or portable structure.
7. If you cannot quickly walk to a sturdy building, immediately get into a vehicle, buckle your seat belt and try to drive to the closest sturdy building.
8. If flying debris occurs while you are driving, pull over and park. Now you have the following options as a last resort:
  - Stay in your vehicle with the seat belt on. Put your head down below the windows, covering with your hands and a blanket if possible.
  - If you can safely get noticeably lower than the level of the roadway, exit your car, and lie in that area, covering your head with your hands.

## DISEASE OUTBREAK

1. Prevention is key. Get your flu shot and other vaccinations.
2. Wash hands often and thoroughly.
3. Stop the spread. Stay home when you are ill. Employers and schools should encourage this policy.

## OTHER TIPS

To minimize damage in high winds, keep your home in good repair. Tacking down loose roofing, trimming trees and keeping gutters clean are good places to start. Make sure your street address number is clearly marked on your home.

# 10

# What to Expect After a Disaster

After a disaster, you may be without power and many of the other services you rely on (water, sewer, phone, cell phone, and businesses). Immediate response may not be possible, so you must be prepared to be self-reliant.

## Re-entry

**BE PATIENT.** You won't be able to return to your home or business until search and rescue operations are complete and safety hazards, such as downed power lines, are cleared. It may take time for emergency crews to reach your neighborhood.

- Residents – Have valid ID with your current address.
- Businesses – Have a valid picture ID, documents showing proof of ownership/rental, County business tax license, names of individuals authorized to be given access on business letterhead.
- Avoid driving, especially through water. Roads may have debris which can puncture your tires! Until power is restored, many traffic signals will be inoperable. Treat any intersection where traffic signals are out as a 4-way stop.

Once you arrive back, walk around your home or business from the outside first to survey damage and enter with caution.

- Open windows and doors to ventilate and dry your home or business.
- If you suspect a gas leak, leave immediately and call 9-1-1 or your natural gas provider from a safe location.
- If your home or business has been flooded, have a qualified licensed electrician inspect the electrical system and appliances before turning the power back on.
- Be extremely careful with fire.
- Let your out-of-town contact know you are alright.

## Post-Storm Safety Precautions

- Keep grills and generators outdoors in a well-ventilated area. Carbon monoxide poisoning is a frequent killer.
- Avoid candles. Use battery-operated flashlights and lanterns instead.
- Stay tuned to your local media for up-to-date emergency information.
- Avoid driving. If you drive, treat any intersection with inoperable traffic signals as a 4-way stop.

- Avoid downed or dangling power lines. Be especially careful when clearing fallen trees.
- Always supervise children-DO NOT WADE IN FLOOD WATERS.
- Be aware of snakes, insects, alligators or animals driven to higher ground by floods.
- Be extremely careful with a chainsaw and follow all safety precautions.
- Call professionals to remove large, uprooted trees, etc.
- Always use proper safety equipment such as heavy gloves, safety goggles, heavy boots, long-sleeve shirts and long pants. Tie back long hair, wear a hat and sunscreen.
- Drink plenty of fluids, rest and ask for help when you need it.
- Don't burn trash.

## Clean-up & Repairs

- Know what your homeowner's or renter's insurance policy covers and what you will need to submit a claim. Take photographs of all damage before repairs and keep all receipts. Make temporary repairs to correct safety hazards and minimize further damage.
- Contact your local building department for information on required building permits. Permits are always required for any kind of demolition or permanent repairs, reconstruction, roofing, or filling.

## Protect Yourself From Contractor Fraud

- Hire only licensed contractors. Be cautious of anyone coming to your home uninvited and offering to do home repairs.
- Obtain a written estimate or contract. Insist on start/completion dates and payment terms in the contract. Do not pay in full before work begins and do not pay the final balance until the work is completed to your satisfaction. NEVER pay with cash.

- Don't pull the permits for the contractor. This may be an indication they are not properly licensed.
- If you suspect a contractor of potential fraud, contact the State of Florida Consumer Fraud hotline at 1-866-966-7226.

## Generators

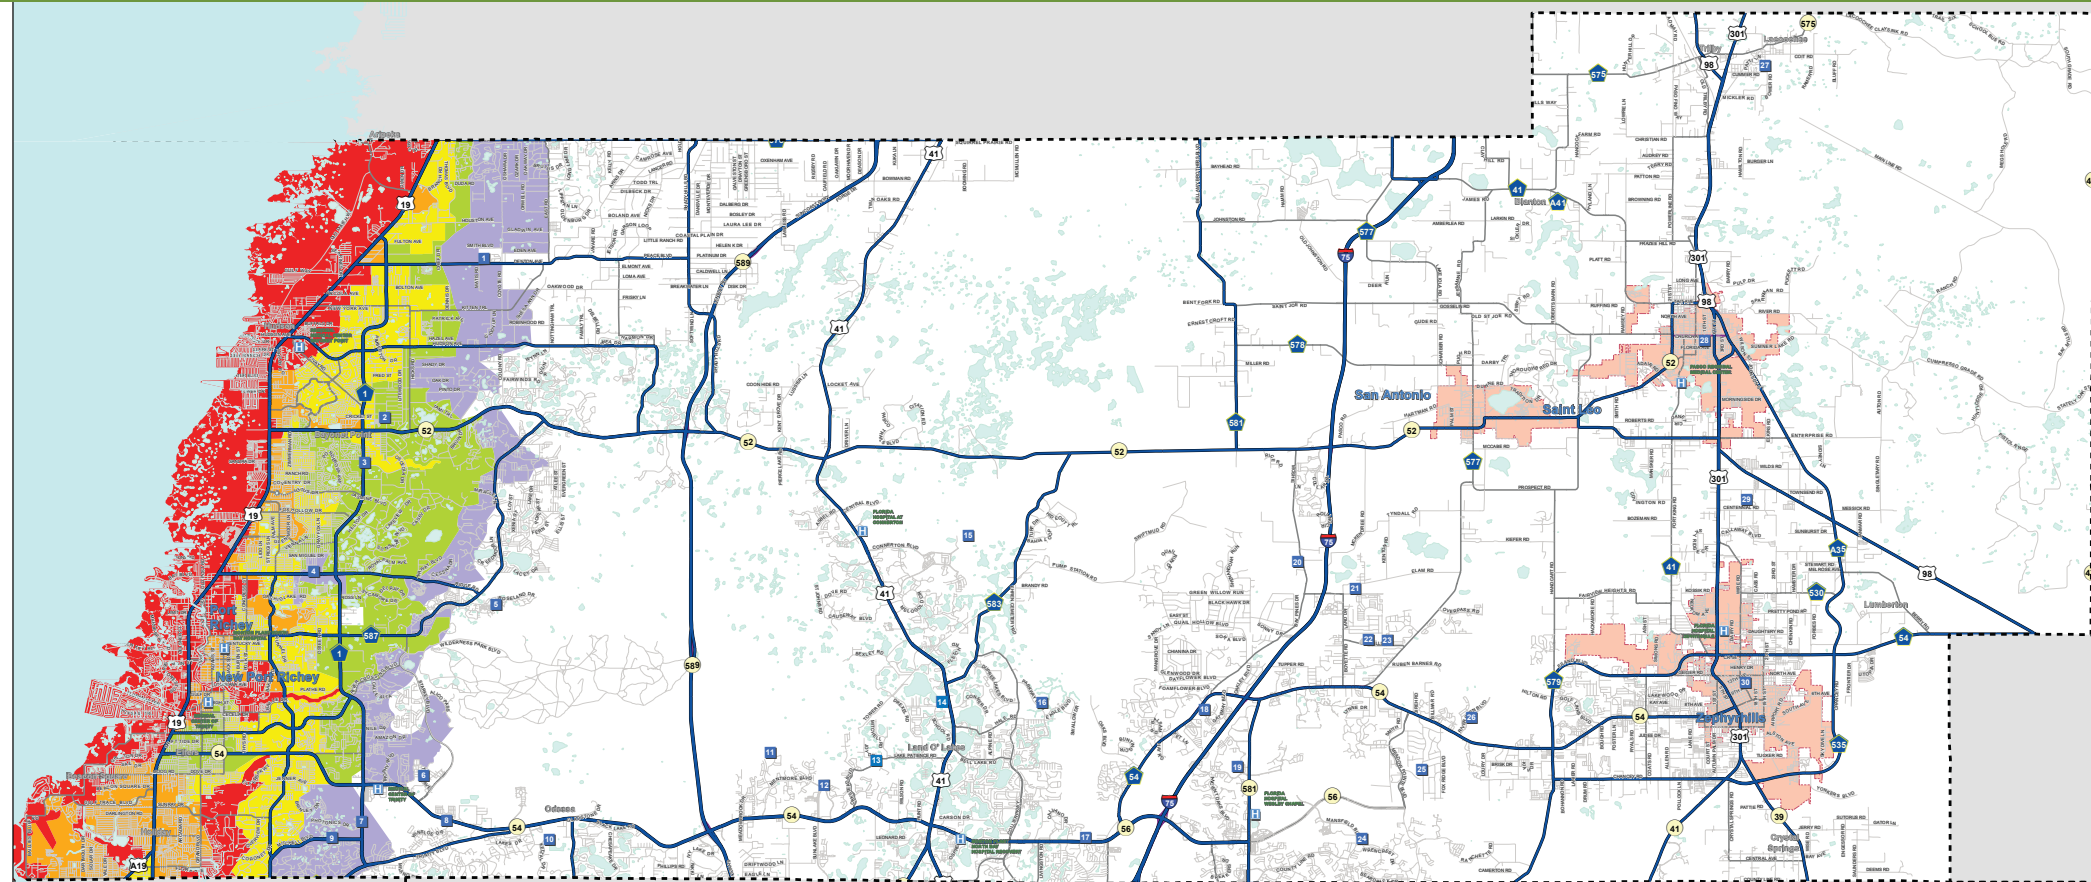

Generators can provide power to your home or business in case of a power outage or shortage.

1. Determine the appliance or equipment you want to use.
2. Determine if a portable or stationary generator is required.
3. Determine if you will need multiple outlets or multiple types of outlets on your generator.
  - NEVER connect a portable generator to building wiring. There is an extreme danger of generator back-feed for the general public (downed wires etc.) and utility workers. Plug appliances, etc., directly into the generator.
  - Place generator outdoors and away from doors, windows, and vents that could allow carbon monoxide (CO) to come indoors. Exhaust fumes are deadly.
  - Before refueling your generator, turn it off and let it cool down. Don't forget to check the oil every time you add gas. Keep generator dry.
  - Conserve fuel by alternating appliances.
  - Store fuel safely outside in labeled approved storage containers.
  - Stationary (whole house) Generators run off gas utility lines or an LP tank and supply electrical power to pre-selected circuits. They MUST be professionally installed by a licensed electrician.

# PASCO COUNTY

# EVACUATION ZONES & SHELTERS

**Hurricane Watch:**  
An announcement that hurricane conditions (sustained winds of 74 mph or higher) are possible within the specified area. The hurricane watch is issued 48 hours in advance of the anticipated onset of tropical-storm-force winds.

**Hurricane Warning:**  
An announcement that hurricane conditions (sustained winds of 74 mph or higher) are expected somewhere within the specified area. The hurricane warning is issued 36 hours in advance of the anticipated onset of tropical-storm-force winds.

 Special Needs Shelter

Shelters with this designation are County- staffed Pet Friendly Shelters. Please bring crate, food, water, medications and proof of vaccinations.

Shelters are not listed in the order they are opened and shelter openings vary with each emergency depending on the type and intensity of the disaster. Stay tuned to local media for a listing of shelters which will be opened for an event. Do not go to the shelter until local officials announce through the media that the shelter is open.

Pasco County provides a shelter program for those residents requiring special medically related care. Special needs shelters will be available for persons requiring more skilled medical care than available in a public shelter but not requiring an acute care facility such as a hospital. If this type of extended care is needed, contact the Pasco County Division of Emergency Management at 727-847-8137 to be considered for registration into this program.

## USING YOUR COUNTY MAP

1. Locate where you live and work on the map.
2. Determine whether you are in an evacuation area, and if so, what level (color).
3. If you are in an evacuation area, or mobile home/RV, decide where you will go if ordered to evacuate. Your choices include:
  - ✓ Home of a relative or friend outside the evacuation zone
  - ✓ Hotel/motel outside the evacuation zone (make arrangements early)
  - ✓ Go to a public shelter
  - ✓ As a last resort leave the area entirely
4. If you must go to a public shelter, make sure you verify the shelter is open before you go.

## HURRICANE THREAT

- ✓ The colored areas on the map are vulnerable to storm surge. Storm surge is produced by water being pushed towards the shore by the force of the winds moving around the storm.
- ✓ Storm surge creates a path of destruction, wiping out structures as it rapidly surges inland and then recedes. This is a life threatening situation for anyone who ignores mandatory evacuation orders and stays in vulnerable areas.
- ✓ Hurricanes are categorized on a scale of 1 to 5, depending on wind strength and destructive power. The evacuation zones are color coded to designate the level of storm surge likely to occur.
- ✓ If you live in an area ordered to evacuate, gather your family/pets and emergency supplies, secure your home and leave immediately. Failure to obey a mandatory evacuation order is a violation of state and local laws.

**Note:** All persons living in mobile homes/RVs must evacuate for all mandatory evacuation orders, regardless of where you are located in the county.

### FLOOD THREAT RECOGNITION SYSTEM

Pasco County has a Flood Threat Recognition System that is used by the Division of Emergency Management to monitor and convey threatening conditions to the public. In addition to the information that will be displayed on our website <http://www.pascoemergencymanagement.com>, residents should tune to TV and radio weather broadcasts and be alert to special local advisories. Local radio and TV stations for our area are:

#### RADIO

WUSF-FM 89.7	WDAE-AM 620
WFLZ-FM 93.3	WFLA-AM 970
WSJT-FM 94.1	WWB-AM 1040
WSUN-FM 97.1	WWJB-AM 1450
WXTB-FM 97.9	WAMA-AM 1550
WQYK-FM 99.5	WBUL-AM 1620
WMTX-FM 100.7	
WRBQ-FM 104.7	
WJQB-FM 106.3	

#### TELEVISION

(Cable channels are specific to cable provider)

#### Bay News 9

WFLA-TV News Channel 8  
WTSP-TV Channel 10  
WTVT-TV Fox 13  
WFTS-TV Channel 28

The Pasco County Division of Emergency Management maintains contact with the National Weather Service and National Hurricane Center and relays updates of threatening weather to government, media, hospitals, and nursing homes. The Pasco County Division of Emergency Management can override the cable broadcast system to provide

the public with information on storms, flood watches, and flood warnings. Law enforcement and fire-rescue officials have the ability to deliver flood warning messages if a storm develops at night with no opportunity for prior warning to the public. Warnings can be delivered to affected residents via telephone through a reverse 911 system. Another source of information is the NOAA Weather Radio. Flood watches and warnings will be broadcast on these radios as soon as they are issued by the National Weather Service.

Evacuation shelters and routes are identified on the website. Assistance in evacuation can be arranged for eligible parties by registering with the Pasco County Division of Emergency Management. Call (727) 847-8137 for information on the Special Needs Program.

### LOCAL FLOOD HAZARD

The biggest threat of general flooding is during the hurricane season (June through November). Pasco County is a participating community in the National Flood Insurance Program (NFIP), which means that you can purchase flood insurance to protect your property against the hazard of flooding. Flooding in Pasco County is caused by riverine flooding, closed basin flooding, and coastal flooding. Sometimes these floods occur as flash floods. Riverine and closed basin flooding occur due to rainfall events and are fresh water floods. Coastal flooding is a salt water flood that occurs as a result of storm surge (wind driven water) or heavy rain, which may be exacerbated by an astronomical high tide. Flood damage probability is high in Pasco County because a large number of existing homes were built prior to Pasco County joining the NFIP and receiving Flood Insurance Rate Maps which indicate required structure elevations to avoid or minimize flooding.

### ARE YOU FIREWISE®?

Wildfires can occur anywhere and can destroy homes, businesses, infrastructure, natural resources, and agriculture. The checklist below provides ways to make your home, property, and other buildings safer from the impacts of wildfires.

- Thin tree and brush cover and remove dead limbs, brush, and leaves from the property.
- Mow dry grasses and weeds and maintain an irrigated greenbelt.
- Move firewood at least 30 feet from the home and other buildings.
- Prune branches to 10 feet above the ground.
- Reduce density of surrounding forest.
- Clean roofs and gutters of dead leaves, debris and pine needles that could catch embers.
- Replace or repair any loose or missing shingles or roof tiles to prevent ember penetration.
- Enclose under-eave and soffit vents or screen with metal mesh to prevent ember entry.
- Cover exterior attic vents with metal wire mesh no larger than 1/8 inch to prevent sparks from entering the home.
- Repair or replace damaged or loose window screens and any broken windows.
- Screen or box-in areas below patios and decks with wire mesh to prevent debris and combustible materials from accumulating.
- Move any flammable material away from wall exteriors – mulch, flammable plants, leaves and needles, firewood piles – anything that can burn.
- Remove anything stored underneath decks or porches.
