**Hepatitis A** is a vaccine-preventable form of infectious hepatitis.

**Hepatitis A** virus is in the poop of people who have the virus. If a person with the virus doesn’t wash his or her hands after going to the bathroom, poop can transfer to people, objects, food and drinks.

**Symptoms**

You can have hepatitis A for up 2 weeks without feeling sick, but during that time you may be spreading the virus to others.

Symptoms usually start 2–6 weeks after infection and last less than 2 months. Some people can be sick for up to 6 months.

**COMMON SYMPTOMS:**
- Stomach pain.
- Nausea and vomiting.
- Yellow skin or eyes (jaundice).

**OTHER SYMPTOMS:**
- Diarrhea.
- Loss of appetite.
- Joint pain.
- Fever.
- Tired.
- Dark-colored urine.

**Think you’re at risk? See your health care provider.**

- Are in close contact, care for or live with someone who has hepatitis A.
- Have recently visited a country where the virus is common—or been in close contact with someone who has.
- Are having sex with someone who has the virus.
- Use injection or non-injection drugs.
- Are homeless or in temporary housing.
- Have recently been incarcerated.

**Stay home from work if you have hepatitis A.**

If you have some symptoms and a close friend, relative or roommate who has been diagnosed with hepatitis A in the past 30 days, see a health care provider immediately.

**LET YOUR BOSS KNOW IF:**
- You’re seeing a health care provider because you have symptoms.
- You’ve seen a health care provider and you have hepatitis A.

**Prevent the spread of hepatitis A.**

**Talk to your health care provider about getting vaccinated.**

**Wash your hands after you use the bathroom.**

Wash with soap and warm, running water for at least 20 seconds:

**BEFORE YOU**
- Prepare food.
- Work with food that isn’t already packaged.

**AFTER YOU**
- Touch people or public surfaces.
- Use the restroom.
- Change a diaper.
- Cough, sneeze or use a handkerchief or tissue.
- Use tobacco, eat or drink.

**The hepatitis A vaccine is safe & effective.**

- If you’re at risk, you should get vaccinated.
- The vaccine is given as 2 shots, 6 months apart. You need both shots for the vaccine to work long-term.
- Contact your county health department if you don’t have health insurance at this time and you need help getting a vaccination.

**ALCOHOL-BASED HAND SANITIZERS DON’T KILL HEPATITIS A GERMS!**

**DON’T SHARE:**
- Towels, toothbrushes or eating utensils.

**DON’T TOUCH:**
- Food, drinks, drugs or cigarettes that have been handled by a person with hepatitis A.
